# HOUSE GOP PLAN FOR ECONOMIC GROWTH

# JOBS

The Republican jobs plan will help:

- Create new jobs;
- Make life work for families; and
- Expand opportunity for all Americans without expanding government.

President Obama's policies are undermining economic growth:

- Energy production on federal land has plummeted & popular jobs projects like Keystone are delayed;
- His health care law is driving up costs & making it harder to hire;
- Regulations & red tape choke small businesses & threaten innovation;
- Our tax code is unfair, complicated, & makes us less competitive; and
- Our debt is a drag on job growth.
